REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Referring to claim 1, Prior Art fails to disclose the receiving station selecting frame encoding parameter based upon estimates of expected network performance for each set of payload encoding parameters in the possible set of payload encoding parameters, a set of payload encoding parameters having optimized network performance characteristics, wherein the frame statistic include a slicer maximum squared error for the header segment and a slicer maximum squared error for the payload segment in combination with other limitations set forth in the respective claim.

Referring to claim 14, Prior Art fails to disclose the receiving station selecting frame encoding parameter based upon estimates of expected network performance for each set of payload encoding parameters in the possible set of payload encoding parameters, a set of payload encoding parameters having optimized network performance characteristics, wherein the expected time of the transmitting from a on the transmission medium is calculated as a function of an average number of payload bytes, a payload symbol rate, a payload bits per symbol, a header segment time on the transmission medium, a collision resolution overhead time, and an expected number of retransmissions, the expected number of retransmissions being calculated as a function of an estimated packet error rate in combination with other limitations set forth in the respective claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
